PROFILE

Computer Science student specializing in information security at Østfold University College, with solid work experience from healthcare, customer service and online retail. Used to working independently and in a structured way under time pressure, and to carrying responsibility alone on evening and night shifts. Strong communication and collaboration skills with colleagues, service users and customers, and committed to delivering quality work whatever the task. Now seeking an IT trainee or graduate program to build on the technical skills from my studies in a real working environment.

EDUCATION

Computer Science – Design and Development of IT Systems, Østfold University College, Halden *Aug 2024 – present*
Specialization: Information Security

- Relevant courses: Security in Development and Operations, Introduction to Information Security, Cryptography and Network Security, Computer Networks, Distributed Systems, Database Systems, Algorithms and Data Structures, Big Data Analytics and BI

General Studies (upper secondary), St. Olav Upper Secondary School, Sarpsborg *Aug 2017 – Jun 2020*

WORK EXPERIENCE

Care Assistant, Home Care Services North, Fredrikstad *Dec 2020 – present*

- Manage time efficiently to ensure necessary care is delivered within tight deadlines, and communicate clearly with service users, colleagues and relatives.

Care Assistant, Home Care Services, Frogner District, Oslo *Aug 2023 – Aug 2024*

- Worked closely with colleagues and healthcare workers in interdisciplinary teams, handling unexpected daily challenges by quickly adapting solutions to individual needs.

Associate, Meny Online Grocery, Bryn, Oslo *Dec 2020 – Aug 2023*

Associate, Grålum Grill, Grålum *Aug 2017 – Jul 2020*

PROJECTS

Security testing of a web application – course: Security in Development and Operations *Spring 2026*

- Built a website with a database (PHP/SQL), then carried out hands-on security testing of a fellow student's solution to uncover vulnerabilities.
- Used the findings to identify and fix weaknesses in my own website – practical experience with vulnerability analysis and secure web development.

Bus app – group project in Software Engineering and Testing *Autumn 2025*

- Role: Product Owner in a team of five – responsible for requirements prioritization, user stories and documentation through Scrum-based sprints (Jira, GitHub).
- The system was built with a Java Spring Boot backend, React Native frontend and PostgreSQL database, with JWT authentication, encrypted communication (TLS) and a CI/CD pipeline in GitHub Actions.
- Helped define non-functional requirements for security and privacy (including GDPR compliance and password hashing with bcrypt).

TECHNICAL SKILLS

Programming: Python, Java, C#, HTML/CSS, SQL

Security: Basic vulnerability analysis and penetration testing, secure web development, authentication (JWT), encryption (TLS), GDPR compliance

Tools/platforms: Git/GitHub, Azure DevOps, MySQL/PostgreSQL, Figma

LANGUAGES

Norwegian: native · English: very good
